DON SUMAYAN

Senior Full Stack Engineer | TypeScript, React & Node.js

Cebu City, Philippines · don.sumayan@gmail.com · linkedin.com/in/donraedelsumayan

SUMMARY

Senior full stack engineer with 11+ years building web and mobile products end to end in TypeScript, React/Next.js and Node.js/NestJS, and 4+ years as a technical lead. Takes features from requirements and design through deployment, integrates third-party APIs, and mentors developers on code quality and delivery. Founding team member at GIG; drives AI-assisted development across the team with Claude tooling and GitHub Copilot agent mode.

SKILLS

Languages & front end: TypeScript, JavaScript, React, Next.js, Redux, styled-components, HTML/CSS, PWA, Angular
Back end & data: Node.js, NestJS, Express, REST APIs, Firebase, PostgreSQL, MySQL, MariaDB, MongoDB, Redis
Cloud & tools: AWS (S3, RDS, ECS), Terraform, GCP, Git, Jest, ESLint, Jira
Mobile: React Native, Expo & EAS (iOS and Android)
AI-assisted development: Amazon Bedrock (Claude), Claude API, OpenAI API, LLM-powered features, prompt engineering, Claude tooling, GitHub Copilot agent mode
Languages: English (full professional), Filipino (native), Cebuano (native)

EXPERIENCE

Technical Lead Aug 2024 – Present
GIG (gigrewards.ph) · Founding team member; started as a project at Sovrun (formerly BreederDAO)

- Lead full-stack development of a rewards platform with points, mobile data redemptions and GCash/Maya payouts, owning architecture and technical direction; scoped and estimated work and integrated third-party APIs.
- Built an AI task analyzer on Amazon Bedrock (Claude) that checks video submissions against a quest's requirements using transcriptions and screenshots, returning a result with a confidence level for first-level validation.
- Provision and manage AWS infrastructure with Terraform; set quality standards, mentor developers and unblock the team through code review.
- Drove the team's shift to AI-assisted development with Claude tooling and GitHub Copilot agent mode, shipping features built with AI coding agents.

Front End Technical Lead Jun 2022 – Aug 2024
Lista Bookkeeping App Inc.

- Led and mentored the team delivering the Next.js web app and React Native (Expo) mobile apps on a NestJS back end.
- Spearheaded the rewrite of the legacy React Native app into a more scalable, performant codebase.
- Raised code quality through code reviews and automated checks (ESLint, Jest); integrated multiple third-party REST APIs.
- Directed the team building prompts and integrations for the company's OpenAI-powered AI assistant.

Senior Software Engineer Apr 2021 – May 2022
Therma (CoInspect PH) · Cebu

- Built React and Node.js features for an energy management system; built reusable components with styled-components and Redux/Redux Thunk, tested with Jest.

Web Software Developer Mar 2020 – Apr 2021
Arcanys (XLR8 Ventures) · Cebu

- Built Node.js CLI tools that extract house-component measurements from industry-standard PDFs.

Web Developer Feb 2017 – Feb 2020
QIMA · Cebu IT Park

- Developed quality-management software for inspection specialists; led a small front-end team and authored its coding standards; built an offline-first PWA with Angular.

Software Development Engineer Apr 2015 – Feb 2017
FPT Software · Cebu

- Built apps in Angular, Java and .NET, including a large Japanese delivery app and an AR app for smart glasses.

EDUCATION & CERTIFICATION

BS Information Technology — Cebu Institute of Technology, 2011 – 2015 · Certification: PHIL-IT GCE
